Attachments: E73 Hopi Arsenic Mitigation Project EPA DWTSA 2012 PS TH Edit (2).docx; E73 Hopi.pdf

Adam, FY 12 docs are on O drive at: O:\Sanitation Facilities Constr\Area SFC\Project Summaries\12PS

This Word file was the latest of 3 there and should match the signed pdf.

Tom

Subject: USEPA will be adding DWTSA money to the HAMP - Project Summary Needed ASAP
Importance: High

Adam,

USEPA will be adding DWTSA funds to the HAMP project for this next fiscal year. The amount we add will either be \$285,000 or \$985,000. The amount we add is dependent on a couple of things that, hopefully, will be resolved in the next week. At a minimum, \$285,000 will be added to the existing HAMP funding.

In the meantime so I can start the IA paperwork with our grants office, I will need a Project Summary for the additional funding. In the past, the Project Summary provided a list of activities, with associated costs, in which activities could be selected depending on the available funding. You can also submit a Project Summary with activities with a \$285,000 budget and activities with a \$985,000 budget. It is up to you how you want to present the information in the Project Summary. The USEPA deadline for getting our grant paperwork in is August 1, 2013, which is tomorrow. Our IA service center that will be processing the IA knows that we will be late with submitting our paperwork, but we would prefer that the paperwork not be submitted to them too late.

If possible, could you please submit a Project Summary by Friday, August 2, 2013? The Project Summary can be in draft form since I think IHS tries to get the Project Summary signed by the tribe before it is submitted to USEPA. This way, I can get the IA paperwork to our grants people early next week.

Thank you...
